

MOHAMMAD AMIL KHAN

+353 899835499 | mohd.amilk09@gmail.com | www.linkedin.com/in/iam-mak | https://iam-mak.github.io/Iam-Mak

Data and analytics professional with hands-on experience in cloud based data platforms, analytics, data integration, and CI/CD automation across enterprise environments. Currently pursuing a master's in Mathematical Modelling and Machine Learning, strengthening expertise in applied machine learning and Python based workflows.

Professional Experience

Cubastion Consulting Pvt. Limited | Gurgaon, India

Senior Associate Consultant

[Jul 2024 – Aug 2025]

Project: Central Customer Portal

- Configured zero copy data integration between Salesforce Data Cloud and Azure Databricks to enable unified, governed data access and SQL-based analytics.
- Developed dashboards in Salesforce Analytics Studio to visualise event logs and user engagement, supporting operational monitoring and non-functional requirements.
- Managed Git/GitHub workflows including branching strategies, pull requests, conflict resolution, and coordinated production deployments across teams.
- Explored Salesforce Data Cloud and Agentforce capabilities through case studies and demos, mapping service automation use cases and success criteria.
- Implemented scalable data ingestion using Salesforce Bulk API v2 and built a secure Azure Blob file-upload integration with validation, reducing manual effort and errors.

Associate Consultant

[Apr 2022 – Jun 2024]

Project: CI/CD Automation

- Coordinated with cross functional teams to gather requirements and produce BRDs, delivery timelines, and system architecture documentation.
- Managed Bitbucket repositories with structured branching and pull request workflows; maintained release notes and runbooks in Confluence to ensure traceability.
- Streamlined CI/CD pipelines by integrating Jira, Bitbucket, and Bamboo with shell scripted automation for test, and deployment, reducing manual effort by ~40%.
- Led CI/CD rollout initiatives that stabilised releases and improved delivery reliability; recognised with a company leadership award.

Project: Center for Competency

- Designed and documented Salesforce data models, relationships, and validation rules for case and service datasets, improving data integrity and reporting reliability.
- Built dashboards using SOQL and Apex to track ticket resolution trends, escalation levels, and operational KPIs, supporting service performance improvements.
- Facilitated cross-team code integration using Git and GitHub, streamlining merges and release coordination

Vedanta Limited | Jharsuguda, India

Assistant Manager

[Jun 2018 to Aug 2020]

- Analysed maintenance reports across 42 machines to identify root causes, translating insights into targeted actions that reduced unplanned downtime and improved operational reliability.
- Collaborated with shift leads to convert root cause findings into preventive maintenance tasks, reducing delays by 20% through improved prioritisation and handovers.
- Prepared weekly KPI summaries on uptime, downtime, and resolution time, enabling faster corrective actions and sustaining equipment availability above 99%.
- Led a 5S continuous improvement initiative that increased the PTM maintenance team's performance score from 52% to 75%, reinforcing standardised processes and visual controls.

Skills

- **Programming & Data:** Python (NumPy, Pandas, Matplotlib, Scikit-learn), SQL, R
- **Machine Learning & Analytics:** Data cleaning, EDA, feature engineering, model training & evaluation (foundational)
- **Cloud & Platforms:** Microsoft Azure , Google Cloud Platform (BigQuery)
- **CI/CD :** Git, Jenkins, Azure DevOps, Docker
- **Analytics & Visualisation:** Tableau, Salesforce Analytics Studio.

Projects

Vehicle Policy Lapse Prediction

- Built a machine learning classification model to predict vehicle insurance policy lapse using customer and policy data, covering data preprocessing, feature engineering, and model evaluation.
- Developed a lightweight Flask based interface to demonstrate model inference and prediction workflows.

Education

Msc in Mathematical Modelling and Machine Learning

[Sep 2025 - Present]

University College Cork, Ireland

- **Key Modules:** Open Source Infrastructure for Modelling Data, Complex Neural Networks, Machine Learning and Statistical Learning, Machine Learning with Applications
- **Academic Project:** Applied K-Means clustering on customer financial transaction data to study customer segmentation concepts and understand algorithm behaviour.
- **Tutoring:** Undergraduate tutor for **ST1050**, supporting foundational statistics coursework using R.

B Tech in Mechanical Engineering, CGPA: 7.7/10

[Aug 2014 to May 2018]

National Institute of Technology Patna, India

Academic Projects & Training

- **Major Project:** Optimised a pneumatic cutting machine to improve performance metrics, earning an A+ grade; collaborated with team members to analyse issues and implement improvements.
- **Industrial Training:** Completed a two month summer training at Hindustan Aeronautics Limited (HAL), supporting quality assurance checks on engine components and compliance with engineering standards

Co-Curricular Activities & Achievements

- Coordinated NSS community initiatives (Cleanliness Drive, Blood Donation Camp) and supported after-school teaching for 150+ underprivileged children through the *Sankalp* initiative.
- Contributed to the design and development of a Formula One-style race car as a member of the SUPRA SAE-India team at NIT Patna.
- Awarded 1st Prize in the Design Innovation Competition organised by IIT Kharagpur and sponsored by the Ministry of Human Resource Development (MHRD).

Certification

- Microsoft Azure Data Scientist Associate (DP-100)
- Salesforce Certified AI Specialist and Data Cloud Consultant
